---

Full Stack Developer with a background in Tourism, customer service, and personnel management, which have shaped me into a professional ready to work as part of a team with a high level of commitment to ensuring the quality and processes of the company. I possess knowledge in agile methodologies, collaborative GIT, algorithms, CSS frameworks such as Tailwind and Material UI. I have experience in Front End and Back End development with Javascript and Typescript, using PERN and MERN stacks. I consider myself an organized professional, constantly learning, and dedicated to corporate objectives. English Level: Professional C2.

## PROJECTS

### Full Stack Web Developer - Markets Center

April 2022 - May 2022

Academic experience. Henry Bootcamp

Web app with the aim of helping small and medium companies in the primary sector expand through the use of the internet.

- Develop a frontend admin dashboard and connect it to the backend to allow admins to manage users, sales, and categories.
- Building form components for creating and editing products, categories, and users and implementing JavaScript validations and connections with our own backend and database.
- Teamwork on the development of the frontend logic for cart functionality, allowing guest users to add products and storing them at the local storage until they become users of the web.

Frontend: Javascript, React, Redux, Material UI, Firebase, Stripe

Backend: Typescript, NodeJS, Express, Node Mailer, Cloudinary, SendGrid

Database: MongoDB, Mongoose

Frontend repository: <https://dub.sh/markets-center-client>

Backend repository: <https://dub.sh/markets-center-api>

### Full Stack Web Developer - Dogs App

March 2022 - April 2022

Academic experience. Henry Bootcamp

Develop an SPA that works harmoniously between an API that renders dog breeds and a custom relational database that stores user-created dog breeds.

- Develop a frontend with several views (Landing Page, Home, Detail, and Form) implementing the principles of SPA, reusable components, and global state management with Redux.
- Design and development of relational database on PostgreSQL using Sequelize as an ODM and ORM.

Frontend: Javascript, React, Redux, CSS Module

Backend: NodeJS, Express

Database: PostgreSQL, Sequelize

Repository: <https://dub.sh/Dogs-App>

## PROFESSIONAL EXPERIENCE

### Educational Mentor

August 2022 - today

Henry, Remote (Valencia, Spain).

- Develop the role of Scrum Master or Product Owner in the students final project stage, accompanying them and teaching them on implementing agile methodologies.
